

Goods-In Checklist

Structured intake process with risk-tiered checking — to be completed for every inbound delivery

HOW TO USE THIS CHECKLIST

This checklist tiers the level of intake checking by supplier risk category. Trusted suppliers receive a lighter-touch process; new or recently-failed suppliers receive a full check. The principle is simple: applying the same intensive check to every delivery is the most common cause of goods-in becoming a bottleneck. Risk-tiering the check restores throughput without reducing control.

Tier A — Trusted suppliers: 12+ months of clean deliveries, no quality issues, no quantity disputes. Lighter-touch check.

Tier B — Standard suppliers: Regular suppliers without Tier A history. Standard check.

Tier C — New or recently-failed: First 6 deliveries from any new supplier, or any supplier with a failed delivery in the last 90 days. Full check including expanded sampling.

DELIVERY DETAILS

Date / Time received:		Goods-in operative:	
Supplier name:		Supplier tier (A/B/C):	
PO / Reference no.:		Vehicle reg.:	
Carrier:		Trailer / container no.:	

STEP 1 — DELIVERY RECEIPT (ALL TIERS)

Check	✓	✗	Note
Vehicle arrived within booked time window (±15 min)			
Trailer/container seal intact and matches paperwork			
Delivery note matches PO number			
Number of pallets received matches delivery note			
Pallets externally intact — no visible damage to packaging			
Temperature at receipt within tolerance (if chilled/frozen)			

STEP 2 — QUANTITY CHECK

Check	✓	✗	Note
Tier A: Match pallet count to delivery note only			

Tier B: Count cartons against delivery note on 1 pallet per 10

Tier C: Full carton count against delivery note on every pallet

Discrepancies recorded and signed off by supervisor

STEP 3 — QUALITY CHECK

Check	✓	✗	Note
Tier A: Spot-check 1 carton per delivery for damage / spoilage			
Tier B: Sample 3 cartons per delivery (random selection)			
Tier C: Sample 1 carton per pallet, minimum 5 cartons per delivery			
Date codes within acceptable shelf-life window (if applicable)			
Product codes match what was ordered (no substitutions without approval)			
Photos taken of any damaged/non-conforming product before unloading			

STEP 4 — PUTAWAY AUTHORISATION

Check	✓	✗	Note
Tier A: Goods-in operative may authorise putaway directly			
Tier B: Team leader sign-off before putaway			
Tier C: Supervisor sign-off + supplier review note added			
Putaway destination locations confirmed and clear			
System receipt completed and stock visibility confirmed			

SIGN-OFF

Goods-in operative name:		Signature:	
Team leader / supervisor:		Signature:	
Time completed:		Stock visible on system at:	
Issues flagged for follow-up:
