

Shift Handover Log

Standardised shift-end documentation — eliminates the handover time loss found in most multi-shift operations

HOW TO USE

Completed by the outgoing shift supervisor in the final 15 minutes of the shift. Handed to the incoming supervisor in person — never left on a desk to be read later. The incoming supervisor reads, signs, and asks questions before the outgoing supervisor leaves the floor.

The single biggest driver of lost time across shift transitions is informal, undocumented handover. A structured log removes this. 5 minutes of structured handover saves 25–35 minutes of confusion, repeated questions, and duplicated work on the incoming shift.

SHIFT DETAILS

Date:		Day of week:	
Outgoing shift:		Outgoing supervisor:	
Incoming shift:		Incoming supervisor:	
Outgoing headcount:		Incoming headcount expected:	

1. TASKS COMPLETED THIS SHIFT

Task / area	Volume / output	Notes
